

I have been a subscriber to XM radio for almost 2 years, but still listen to local radio to hear some local personalities and local business news. XM radio's new traffic and weather service will be helpful for me when I want that information in a hurry...I would never tune into a local station and WAIT for that information.

Competition is good. New technology does not mean that the old stuff will disappear, it will only have to improve itself to compete. That is the American way.

Please allow XM to provide traffic and weather info by rejecting NAB 04-160. Any act of protectionism on the part of the FCC will be poorly received by this tax-paying and voting American.
